

# anti-ATF7-RAB-T51

## Applications

Competition ELISA	Western Blot	SPR	Spiked IP	Immunofluorescence	IP-MS	ChIP
			Pass			

\*rAb has been tested for the following applications. See below for the experimental details.

## Antibody information

**rAb ID:** anti-ATF7-RAB-T51

**Description:** recombinant Fab fragment obtained by recombinant antibody (rAb) phage display recognizing ATF7 protein under non-denaturing conditions; specificity and affinity tested.

**Binder type:** rAb **Isotype:** IgG1 **Species:** *Homo sapiens* **Produced in:** *E. coli* **rAb tags:** Avi-tag; Flag-tag

**Specificity:** reacts with *Homo sapiens* ATF7 **Epitope:** binds to folded domain amino acids 341-404

**Storage conditions:** short term – store at 4°C (over 6 months), long term - PBS -20°C or -80°C

**Link:** <http://recombinant-antibodies.org/binders/anti-ATF7-RAB-T51>

## Antigen information

**Protein Name:** Activating transcription factor 7

**HGNC Symbol:** ATF7 **HGNC ID:** 792 **Species:** *Homo sapiens*

**UniProt AC:** P17544 **UniProt KB:** ATF7\_HUMAN

**Protein Sequence:**

MKIEEHHHHHHSSGKLGSTEDLYFQSAAQPADPDERRQRFLERNRAAASRCRQKRKLWVSSLEKKAEEELTSQNIQLSNEV  
TLLRNEVAQLKQLLL

**Tag N-terminus:** MKIEEHHHHHHSSGKLGSTEDLYFQSAAQPA **Tag C-terminus:**

**Vector Type:** RH2.2 **Vector Link:** <http://dnasu.org/DNASU/GetVectorDetail.do?vectorid=612>

**Protein Sequence Position:** 341-404 **Antigen source:** *E. coli* **Source Lab:** RAN **Source Lab ID:** Atf7 **Description:** affinity purified recombinant protein

## Validation data

### Spiked IP:

**Status:** Pass

Experimental Conditions: <http://recombinant-antibodies.org/protocols/spiked-IP>

### Immunofluorescence:

**Status:**

Experimental Conditions: <http://recombinant-antibodies.org/protocols/immunofluorescence>

### IP-MS – immunoprecipitation for mass spectrometric analysis:

**Status:**

Experimental Conditions: <http://recombinant-antibodies.org/protocols/IP-MS>

### ChIP – chromatin immunoprecipitation:

**Status:**

Experimental Conditions: Pending

### IP – immunoprecipitation:

**Status:**

Experimental Conditions: Pending

### SP Elisa:

**Status:**

Experimental Conditions: <http://recombinant-antibodies.org/protocols/ELISA-IC50-EC50-direct-coating>
